Footpaths News January 2024

There have been 12 reports this month.

The repairs to the damaged bridge at Thornton has been delayed due to bad weather.
A fallen tree at Shepshed reported by Philip Thorne has been removed.
The stiles needing repair in Burbage reported by Chris Bancroft has been actioned. The PROW team have written to the landowner requiring repair and will monitor the situation.
The rickety stile I reported when walking from The Dog and Gun the other week has been repaired and the gate I discovered in splendid isolation from an electric fence is now contiguous with the fence just outside Launde Abbey
I had difficulty crossing a stile near to the Bull, Leicester Forest West ; I remember Andy Brunson bringing this to my attention last time we were in the area.
The height from the footstool to the top of the fence is 700mm whereas the maximum recommended is 450mm. I will let you know progress on this one.
